

# HEALTHY LAND FOR HEALTHY HORSES

PRACTICAL WAYS TO  
PROTECT YOUR LAND,  
IMPROVE FORAGE, AND  
SUPPORT HEALTHY  
HORSES

Join this free webinar hosted by Ogwell Parish Council Biodiversity Action Group and delivered in partnership.

Horse land makes up a significant part of the local landscape.

How it is managed affects soil health, water movement, plant diversity, and wildlife, as well as horse welfare.

This session explores how everyday grazing and turnout choices can:

- support healthier soils and more diverse plant life
- reduce mud, compaction, and surface water issues
  - improve forage quality for horses
  - contribute to more resilient local ecosystems

You'll come away with practical, achievable steps that work with natural processes and suit real-world constraints.
